

The Nuclear Institute is the only professional membership body dedicated to the nuclear sector. With more than 4,000 members, including senior and highly qualified leaders in their respective fields, the NI covers both the civil and defence sectors. Among its extensive activities are educational and outreach initiatives, and it organises must-attend conferences and events as well as publishing a respected industry journal.

The NI works with individual and corporate members to facilitate continuing professional development, provide independent recognition and accreditation of nuclear professionals, as well as offering routes to professional registration and chartership.

Nuclear Future is the highly regarded journal of the Nuclear Institute. It is published six times a year and is distributed directly to more than 3,000 members, among them key decision-makers. *Nuclear Future* is relied upon by its members to communicate key news and events, interview leading figures, and provide detailed analysis, commentary and high quality technical papers. Put simply, *Nuclear Future* defines the nuclear industry.
