

Modelling in Nuclear Science and Engineering

Sponsorship Opportunities

London, UK

6-7 November 2025
London

Conference overview

The 8th Modelling in Nuclear Science and Engineering Conference will bring together the modelling community to share best practice in techniques, improve design and operation of nuclear energy generation, processing and storage facilities including power plants; with the aim of protecting society by improving the safety of these facilities.

The goal of scientific modelling as an activity is to make features and performance of the design easier to understand, quantify, visualise, or simulate by adopting rigorous scientific methods. This Conference will provide a platform to highlight exciting new modelling methods and applications.

Why Sponsor?

Align your organisation with this conference, which has built a reputation within the nuclear modelling community as a key event to share knowledge, connect and meet new collaborators.

With a focus in 2025 on early careers and a substantial attendance from academia, including PhD students, this provides opportunities for recruitment of highly-skilled young people who are looking to join the nuclear industry.

In addition, your sponsorship indirectly facilitates the charitable activities carried out by the Nuclear Institute, supporting high standard of nuclear professionalism and the maintenance of an expert community in the nuclear industry.

Sponsorship Structure

Sponsorship packages will be offered on a 'first come, first served' basis.
All packages are subject to VAT @ 20%.
