

SDF Supply Chain Quality Working Group

Strategy Sub-Group – Industry Wide Supplier Risk, Opportunity & Intelligence

Plan on a Page: Risk & Intelligence

Lead: Tony Roberts

Date: 17/02/2025

Vision: visibility / sharing of risks / intel being identified within individual licensees / suppliers, and ability to address risks (where appropriate) in a more cross-industry manner

Problem / Improvement Statement:

Intelligence gathered by every licensee and supplier separately. Routes to sharing intel not always clear (especially when not in public domain). Issues get solved locally irrespective of whether industry wide issues – not effective use of resources, and unlikely to have levels of influence to solve issues, instead providing localised “sticking plasters”. Inefficient, more expensive, and less likely to produced “industry wide excellence”.
